

MANY HANDS MAKE LIGHT WORK!

The LCDC has something for everyone.

At our meetings and events we invite you to participate in discussion, hear from political candidates and other speakers with expertise, ideas and opinions about current issues. It's a great way to stay up to date with the current political goings-on.

But perhaps you have some more time to spare?

We also have a number of volunteer subcommittees that focus on various long-range projects which need active members. We have campaign work to do along with fundraising, community outreach events and communication, and committee administration activities.

No effort is too small

From meeting/greeting at events to writing letters to the editor to stuffing envelopes to making phone calls, we need your help to **WIN in 2020!**

If you have a particular skill or interest to offer that can help with our work, please share below and a member of the Executive Committee will reach out to you about joining a subcommittee or working group.
